### CAREER OBJECTIVE

Frontend-focused Software Engineering student with hands-on experience building responsive web and mobile interfaces using React, JavaScript, HTML, and CSS.

Strong foundation in UI/UX principles, component-based development, and modern frontend workflows. Seeking a frontend developer internship or junior role to build real-world, user-focused applications.

### PROJECTS

#### Companio - AI-Based Companion App (Team Project)

- Contributed to frontend-focused documentation and UI planning
- Worked in an agile team environment with structured deliverables

#### Moodware 2.0 - Mood Tracking App (Solo Project)

- Built an Android app using Kotlin for mood tracking and journaling
- Designed clean, user-friendly UI with smooth navigation

#### Billo - Invoice Generator (Solo Project)

- Designed a clean invoice generator interface focused on usability
- Delivered a functional prototype deployed via Canva

#### Calculator Web Application

- Developed a responsive calculator using HTML, CSS, and JavaScript
- Focused on clean layout and intuitive interactions

#### Portfolio Website (React + Framer Motion)

- Designed and developed a personal portfolio using React and Vite
- Implemented smooth animations, interactive UI, and responsive layout
- Deployed live using GitHub and Vercel
